HOUSTON, Aug. 5 – Dragon Oil PLC tested the Lam 13/135 development well in the Caspian Sea off Turkmenistan at the combined rate of 1,320 b/d of oil. TD is 3,302 m.

The rate was slightly below expectations, Dragon Oil said, but is expected to improve as pressures of the gassy zones normalize and enable the oil zones to produce at normal levels.

Dragon Oil skidded Platform Rig 40 to Slot 5 on the Lam 13 platform, where it has spud the Lam 13/138 development well.
